

Descriptive Statistics & Summary Measures

Statistics I · Lecture Notes · Sample placeholder

This is a placeholder PDF generated so you can test the viewer.

Replace this file with your real lecture notes at the same path:

files/statistics/descriptive-statistics.pdf

1. Population vs. sample
2. Types of data: nominal, ordinal, interval, ratio
3. Frequency distributions and tabulation
4. Graphical representation: histograms, ogives, boxplots

Descriptive Statistics & Summary Measures

Statistics I · Lecture Notes · Sample placeholder

Continued — page 2 of the sample document.

- 5. Grouped vs ungrouped data
- 6. Class intervals and class boundaries
- 7. Relative and cumulative frequency

Swap this file out any time — the viewer just reads whatever PDF is sitting at the path referenced in `js/semester-data.js`.
